(1) Average Annual Returns w/o Surrender Charge assumes no surrender charges were applied during the time period.

(2) Average Annual Returns w/Surrender Charge assumes a surrender charge was applied for the given time period.

(3) Year-To-Date returns are not annualized.

(4) Subaccount Inception returns are calculated from the date each subaccount entered the separate account, American Century, Dreyfus, EquiTrust, Fidelity, JP Morgan,

Summit and T. Rowe Price 2/11/2002; American Century Mid Cap Value, Fidelity Freedom 2015, Freedom 2020, Freedom 2025 and Freedom 2030 5/1/2006; Fidelity Real Estate 5/1/2007.

(5) First Activity returns are calculated from the date on which the first purchase was made in the subaccount.

* VIF refers to the Variable Investment Fund.

(6) An investment in the EquiTrust Money Market Portfolio is neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any government agency. Although the EquiTrust Money Market Portfolio seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the subaccount.

(7) This yield quotation more closely reflects the current earnings of the portfolio than the total return quotation.

(8) The Mid-Cap Growth Portfolio is closed to new investors and no longer an investment option for Contracts issued on or after May 1, 2004.

**Fidelity Investments is a registered service mark of FMR Corp. VIP refers to the Variable Insurance Products Fund.

Performance data shown represents past performance of funds underlying the Variable Annuity. Past performance does not guarantee future results. The figures shown are net of respective fund investment management fees, mortality and expense risk charges of 1.40% and the \$30 annual administrative charge. The Average Annual Returns w/surrender charge reflects the variable annuity's maximum surrender charge of 8% of amount withdrawn, not exceeding 9% of the total premiums paid. A 10% Federal penalty tax on certain withdrawals of earnings before age 59 1/2 may be applied. The returns are historical and include the change in unit price and the automatic reinvestment of dividends and capital gains assuming an initial \$10,000 investment. If the initial investment is less than \$10,000, the returns could be lower. Investment return and principal value of an investment will fluctuate so that investors' shares/accumulation units (as applicable), when redeemed, may be worth more or less than their original cost. Consider the investment objectives, risks, and charges and expenses of a variable annuity carefully before investing. An investment in a variable annuity certificate is subject to market risks, including the potential loss of principal. For this and other information about variable annuities, obtain a prospectus from your Modern Woodmen representative. Read it carefully before you invest or pay money. Current performance may be higher or lower than the performance data quoted

Declared Interest Option (DIO)***	Current Rate	Effective Date
Variable Annuity	3.45%	7/1/2009

***The Declared Interest Option guarantees a 3% rate of return for the Variable Annuity backed by the claims-paying ability of Modern Woodmen of America. The current rate of return is declared by the Board of Directors and may change at any time.

(1) Average Annual Returns w/o Surrender Charge assumes no surrender charges were applied during the time period.

(2) Average Annual Returns w/Surrender Charge assumes a surrender charge was applied for the given time period.

(3) Year-To-Date returns are not annualized.

* VIF refers to the Variable Investment Fund.

**VIP refers to the Variable Insurance Products fund.

(4) An investment in the EquiTrust Money Market Portfolio is neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any government agency. Although the EquiTrust Money Market Portfolio seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the subaccount.

(5) This yield quotation more closely reflects the current earnings of the portfolio than the average annual return quotation.

(6) The Mid-Cap Growth Portfolio is closed to new investors and no longer an investment option for Contracts issued on or after May 1, 2004.

Performance reflects the hypothetical investment experience as though the subaccounts had been in existence since the inception date for the underlying funds. Performance data shown represents past performance of funds underlying the Variable Annuity. Past performance does not guarantee future results. The figures shown are net of investment management fees, mortality and expense risk charges of 1.40% and the \$30 annual administrative charge. The Average Annual Returns w/surrender charge reflect the variable annuity's maximum surrender charge of 8% of amount withdrawn, not exceeding 9% of the total premiums paid. A 10% Federal penalty tax on certain withdrawals of earnings before age 59 1/2 may be applied. Refer to the underlying fund prospectus for information regarding investment objectives and risks, charges and expenses. The returns are historical and include the change in unit price and the automatic reinvestment of dividends and capital gains assuming an initial \$10,000 investment. If the initial investment is less than \$10,000, the returns could be lower. Consider the investment objectives, risks, and charges and expenses of a variable annuity carefully before investing. An investment in a variable annuity certificate is subject to market risks, including the potential loss of principal. For this and other information about variable annuities, obtain a prospectus from your Modern Woodmen representative. Read it carefully before you invest or pay money.
